

Anty-Covid: Informatyka w zwalczaniu Covid-19

Jerzy Nawrocki, Zbyszko Królikowski

**Instytut Informatyki
Politechnika Poznańska**

**Seminarium dyplomowe
w formie zdalnej:
Wstępne doświadczenia**

Zdjęcie: <https://santanderimpactededucation.com/some-great-benefits-of-online-learning/>

Agenda

- **Kontekst**
- **Problem**
- **Metoda**
- **Zebrane doświadczenia**

- **Seminarium dyplomowe mgr**
(semestr letni 2019/20)
- **Specjalność: *Software Engineering***
- **14 studentów** (w tym 4 obcokrajowców)

Kontekst

Praca magisterska (informatyka tech.)

**Systema-
tyczny
przeгляд
literatury
(SLR)**

**Własny
pomysł**

**Badania
empi-
ryczne**

- Pace of adoption of new features of C# by software developers
- Definition of Done - Is it worth to use it in agile software projects?
- Evaluation of programming environments for quantum computing
- Comparative analysis of high availability solutions for MySQL/MariaDB
- Comparative study of asynchronous messaging systems
- **OCR system for automated receipt reading**
- Analysis of execution metrics for TensorFlow Lite
- Quantitative analysis of pulmonary fibrosis based on CT
- On the approaches to testing NFRs by software development teams
- On the quest to find new lines of code measures
- Automated classification of code review comments
- Word-embedding model for the requirements-engineering domain
- Tabular functions for end-user programming

Semestr zimowy: *Pre-diploma Seminar:*

- Markus Puschel, *How to Give Strong Technical Presentations*, ETH Zurich
- Structured abstract
- Systematic Literature Review
- Validity threats to results of empirical study

Agenda

- **Kontekst**
- **Problem**
- **Metoda**
- **Zebrane doświadczenia**

Problem

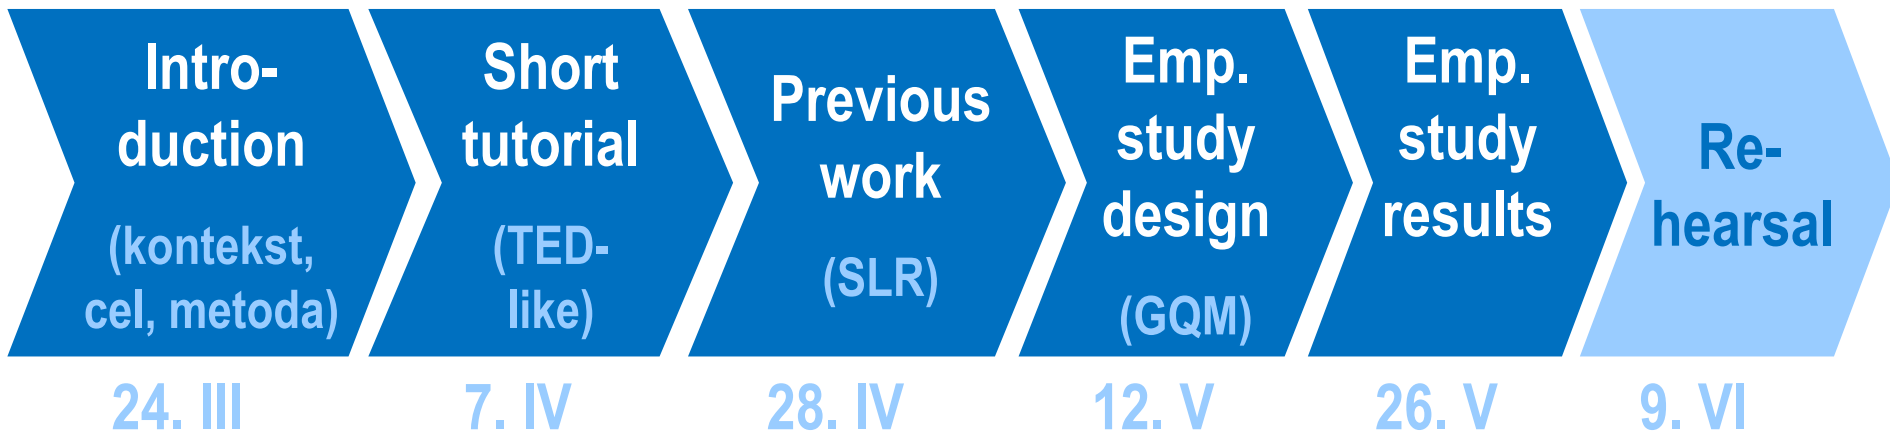

- 12.III PP przeszła na nauczanie zdalne.
- Student **nie** przygotował karty pracy dyplomowej na 17.III.
- Oto wymówka: "**Bo jest chaos**".

Agenda

- **Kontekst**
- **Problem**
- **Metoda**
- **Zebrane doświadczenia**

Przyrostowe referowanie postępów

- 2 grupy (A i B),
- Referaty co 2 tygodnie (11' prezentacja + 4' uwagi)

To nie jest model kaskadowy!

Wykorzystane narzędzia

Workshop: repozytorium slajdów i recenzji

- deadline dot. slajdów i recenzji,
- definiowanie kryteriów oceny prezentacji

BigBlueButton: prezentacje on-line

- współdzielenie ekranu,
- proste zarządzanie prelegentami i dyskutantami,
- szybkie przechodzenie od jednego prelegenta do drugiego,
- nagrania z dyskusji jako notatki

Questionnaire & Feedback: opinie studentów

- podliczanie wyników i wykresy słupkowe

File: Wytyczne, przykładowe prezentacje i harmonogram prezentacji

Participants: zainteresowanie promotorów

Guidelines – Outline of presentation (SLR)

1. Context (thesis' motivation, aim and method) (~ 1')
2. Aim of the literature review (~ 0.5')
3. Research question(s) (~ 1')
4. Searching strategy (bibliographic DBs + queries) (~ 1')
5. Filtering procedure (~ 1.5')
6. Data extraction results (~ 2.5')
7. Conclusions (~ 2')
8. Validity threats (~ 1.5')

Guidelines – Evaluation criteria (SLR)

- A. Is the aim of the SLR consistent with the aim of the thesis?
- B. Have been the bibliographic databases properly selected?
- C. Is the translation of each research question into query appropriate?
- D. Is the filtering process of good quality?
- E. Is the data extraction table well designed taking into account the research questions?
- F. Are the conclusions appropriately inferred from the data extraction table?
- G. Are you convinced that this SLR is complete (no important paper has been overlooked)?

Agenda

- **Kontekst**
- **Problem**
- **Metoda**
- **Zebrane doświadczenia**

Reflection Workshop (~ 10.V, po prezentacji nr 3)

Does the seminar stimulate you to work in a more systematic way on your thesis?

Response	Average
Rather no	31%
Hard to say	8%
Rather yes	46%
Definitely YES	15%

Reflection Workshop (~ 10.V, po prezentacji nr 3)

Is the feedback obtained from your colleagues and Jerzy Nawrocki helpful?

Response	Average
Rather no	15%
Hard to say	8%
Rather yes	38%
Definitely YES	38%

Reflection Workshop (~ 10.V, po spotkaniu #3)

Is your promoter/supervisor helpful enough?

Response

Average

Rather no

 15%

Hard do say

 15%

Rather yes

 15%

Definitely YES

 54%

What are the main strengths of the seminar?

1. "I really like the tutorial part, it was a nice occasion to learn something new."
2. "Focus on research part."
3. "The seminar classes are always well organized."
4. "We work in a systematic way."
5. "We get a high quality feedback."
6. "Training your presentation skills."
7. "Surveys like this one. I really like this idea"

What are the main weaknesses of the seminar?

1. "It requires quite a lot of time to prepare the slides."
2. "Predefined order may sometime not fit the thesis calendar."
3. "Agenda for presentations."
4. "The most questions I received were about visual aspects of my presentation."

What would you suggest to try?

- (–) "Maybe switching to focusing on individual schedules?"
- (+) "We could be getting the recordings of the seminars so that we can later revise the feedback that we received."
- (+) "Send an optional invitation to the promoters to take part on the meeting"
- (+) "Maybe some comment from supervisor of the thesis"

Feedback (~20.V, spotkanie #4)

Which mode of Diploma Seminar is more effective and useful?

Zakończenie

Prowadzenie seminarium dyplomowego w środowisku Moodle:

- (1) powinno być szczególnie zalecane na studiach niestacjonarnych;
- (2) będzie kontynuowane na specjalności *Software Engineering* przynajmniej w kolejnym roku akademickim.
